A Warning About **Evaporated Milk**

If you can't get Van Camp's Milk at your store, ask your grocer to get it. Don't take some other brand and think it is like Van Camp's.

All Evaporated Milk looks alike and tastes much alike. But there is a difference. And the difference in quality makes a vast difference in the manufacturer's cost and his profits. This is important to you.

The difference is in the richness, for after purity, richness controls the value of milk.

The manufacturer of some other brand may have told your grocer his brand is as rich as Van Camp's. But is it so?

Why Quality is Reduced

Just now the United States laws don't protect you and your grocer against weak, Evaporated Milk, because the standard has been relaxed. The law is not enforced. There is much competition and great temptation to reduce the quality so the wholesale price can be reduced.

Van Camp's Milk has not been reduced in price (your grocer will tell you that) and we positively guarantee you the quality has not and will not be reduced.

Quality is what you must have and we know it is wise to give it to you. So quality is what you can depend upon in Van Camp's Milk.

How Quality is Reduced

It is just a question of evaporation. Onethird of the water of raw milk can be taken out by evaporation, or twice as much water can be taken out. The resulting product of both processes will look and taste much alike.

But stop and think of the difference in cost. Realize how it will be when you come to dilute the milk for use.

Van Camp Packing Co.

Is it not perfectly plain why some brands of milk are urged on you by manufacturers as "Just as good as Van Camp's"? Don't take some other brand and think it is like Van Camp's Evaporated Milk.

Not "Condensed Milk"

One should not confuse Van Camp's with "condensed milk." "Condensed Milk," by weight, is about half milk and half sugar—the sugar being used to preserve it. One can't use "condensed milk" for cooking.

Van Camp's is nothing but milk—no sugar, no starch, no preservative. The preserving is done by sterilization.

Therefore, Van Camp's serves every purpose of raw milk and cream. It is the ideal milk for cooking. It gives to milk dishes a richness and flavor which you never get from raw milk.

Another fact is that Van Camp's Milk is sanitary. Our cows are inspected; so are the men who milk them. There is no chance of infection. Our dairies are sanitary. The buildings where our milk is evaporated are

built without wood. You know that Van Camp's is safe.

You can judge from these facts, in buying milk, how to get the most for your money.

No remedy that does not entirely remove the cause of Catarrh from the blood will ever make a permanent cure of the trouble. Just as long as the circulation remains contaminated with the impurities and catarrhal matters which produce the trouble, the mucous membranes or inner linings of the body will be kept in a state of irritation and disease. Sprays, lotions and other local applications will sometimes temporarily relieve the tight, full feeling in the head, buzzing noises in the ears, uncomfortable, stuffy feeling of the nostrils, and help to loosen the mucus in the threat; but Catarrh is a constitutional blood disorder and until it has been entirely driven from the system there can be no permanent cure. S. S. S. cures Catarih by removing the cause from the blood. It attacks the disease at its head and by thoroughly purifying and cleansing the circulation, and ridding it of every particle of impurity, and at the same time enriching the blood, allows the inflamed and irritated membranes to heal improve the transfer health and stops every disagreeable symptoms. to heal, improves the general health, and stops every disagreeable symptom.
